HELP DESK

This is the home screen of the proposed system consists of seven buttons.

In order to go to the desired screen; the users just have to click the related button.

By clicking the Home, Add Student, Add Attendance, View Student, View Attendance, Time Table, Setting, their respective screen will appear.

In home screen there is also a select class/Lecture where users may chose lecture.

ADD STUDENT

This is the student screen which provides information about student's data such as Student Name, Father Name, Mobile, and Roll No. , Address.

The Add student enables the user to enter new entries similarly button update button enable the user to edit/ modify, where, Delete button is used for deleting the record.

ADD ATTENDANCE

This is the screen for attendance purpose, the name and the program is automatically retrieved from the database. If the student was present then the present checked box is clicked similarly if the student was absent then the absent check box is clicked instead of present check box by clicking the save button information will be stored and next student info immediate appeared.

VIEW STUDENT

This is the screen where all the students' information is appeared. Teacher can view the student's record at anytime and anywhere. Teacher can update and delete the records.

TIME TABLE

This is the screen which shows the time table about the subject .this form is used for entering the information related to particular subject. Just teacher click the add button, enter the period/lecture and give the short description about the subject. By clicking the add time table button we can easily insert a new entry of the subject. If teacher wants to view time table simply by click the view button so teacher can easily view table.
